

DDGS Drying

Ask the Experts!

Are you experiencing one or more of the following?

- Fires
- Explosions
- EPA or VOC Issues
- Neighbor Complaints
- Smell
- Smoke Discharge
- Frequent Duct Cleaning
- Low Availability
- VOC Issues
- Low Price for your DDGS

Our 47+ years of drying experience can benefit you in many ways. We don't take an Alfalfa Dryer and think it is just "perfect" for drying your valuable DDGS

... we know better!

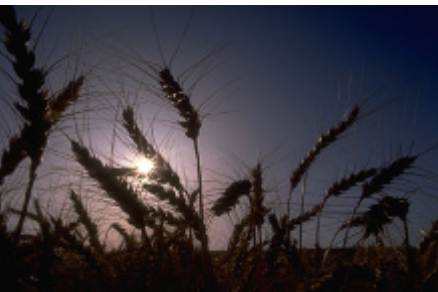

What can we do? Just ask!

Let VENTILEX show you how to solve these and other issues by using our exclusive Low Temperature Drying System approach.

You will benefit by:

- Getting higher profits from your DDGS—Perhaps 50% more!
- Lowering your operational and maintenance costs
- Protecting your employees from dangerous conditions
- Increasing your capacities and shipments
- Staying in compliance with State and Federal Regulations
- Being a good neighbor, resulting in community support

We built our company and reputation on custom designs and rigorous pilot testing. We offer a solution specifically for each application. Our list of customers and applications is a "Who's Who" of the world Fortune 1000. Why not contact us and let us help solve your DDGS drying problems. Whether a new or existing plant, we can help.
